

Argumentative Essay on Artificial intelligence

Here you have an Argumentative Essay on Artificial intelligence with Pdf. You can Download it free and can take advantage of many more types of essays.

Introduction

With the advancement of science and technology, it isn't easy to estimate how far and how much we can develop. According to experts, the world's future seems to be in the hands of Artificial Intelligence. And the time is thought to be not far off when almost every aspect of our lives somehow involves the help of AI.

As I use the word 'Artificial Intelligence' and many others use this word in their daily lives or at least have encountered this word, are we really what it stands for?

The ability of a computer system or machine to process and process information as a person is called Artificial Intelligence or AI. It can read, analyse, copy, and adapt to new information and perform without much external intervention.

Experts believe that AI will make human life easier by providing a solution to almost every challenge in the future. People will also be made aware of potential threats from time to time through Artificial Intelligence. One of the fastest-growing fields in technology and innovation is AI.

Artificial intelligence (AI) has built a name for itself in many marketing endeavours. And the Automation of marketing processes has recently increased the need for AI implementation in the industry. AI also provides opportunities for advertisers to grow their business and provide helpful insight.

Artificial Intelligence can be divided into four categories, and Arend Hintze introduced this division.

The first types of AI are those machines that can respond to specific situations, but they do not have a memory, so they cannot read or use past knowledge. A basic illustration of this first type of AI is computer chess games. The second type of AI is those machines that can manipulate memory to create the future. An excellent example of this second type of AI self-driving car.

The third type of AI currently exists only in theory, and in view, it will be able to have human emotions such as beliefs, desires, ideas, intentions, etc.

The most complex AI method, if it ever existed, would be this fourth type of AI. This fourth type of AI machine will have a sense of self-awareness, emotions, and awareness. If this kind of AI existed, it could be a fundamental change.

AI is essential in the use of health care. Different companies are trying to develop various diagnostic technologies quickly with the help of AI.

Artificial Intelligence can save a lot of time and effort in the business world. Robotic Automation is a type of application used to complete human business activities.

In the field of education, AI technology meets the needs of students. The AI-enabled automatic grading system saves more time on results. Artificial intelligence (AI) is a fantastic way to boost productivity.

And in various other fields, the contribution of Artificial Intelligence is enormous. Therefore, it is clear that Artificial Intelligence is all set as the world's future. The world looks exciting and impressive with Artificial Intelligence.
