

Examples of argumentative essay on abortion

Here you have examples of argumentative essay on abortion with Pdf. You can download it free from here and take advantage of any other essay examples.

Introduction

Abortion is what is known as abortion by voluntary abortion. In medicine, Abortion is called one of the safest procedures. It is said that even giving birth is more dangerous than abortion and puts the mother's life in danger. Therefore, when done according to safety rules and procedures, Abortion is safe and effective. However, accidents occur when they are carried out in unsafe ways.

It is estimated that there are 56 million abortions every year with 45% of procedures following unsafe methods. These unsafe methods are often used when the abortion procedure is illegal. People have very different ideas about abortion. Many people who do not support abortion support their arguments in religious terms and call themselves 'pro life'.

In the United States of America for example, Abortion is legal but may be subject to restrictions by appropriate jurisdictions. One major controversy has arisen over the rise of Donald Trump when lawmakers support abortions based on religious rules. They call themselves 'pro life' and believe that the embryo can feel emotions, and we have no right to end its life.

However, the Republicans support abortion and believe that only a mother can decide what to do with her body. According to them no one has the right to intervene. Above was a view of American society, but this, in fact, reflects the views of the whole world.

Ironically, most men do not approve of abortions, since this is one of the reasons why a woman chooses Abortion. If a person is not ready or stable enough to feed a child, why bring a child into the world to suffer. It is the woman who should, in fact, be the only one to make decisions about abortion.

The foetus or fetus in the womb feels emotionally. On the contrary, neither of us remembers being a foetus or a fetus, and there is no evidence that you have any emotional attachments, so why support the arguments in those allegations. Sex is a need and desire of the body, to be normal and not a sin, and it should be open and free. Promoting people's sexual health will also promote sex education and can even reduce abortion rates if people are more concerned about what others are doing with their bodies.

If a person believes that abortion is a sin, he should also not view sex as a wrong thing. As a world full of hunger, poverty, and depravity, it is all too common to be plagued by a lack of knowledge about sex and the barriers to abortion. Although, no matter what a person does to get rid of the abhorrence of abortion, the thinking processes of some individuals will never change. There is much one can do to authorize Abortion to reduce mortality and to promote safer abortion methods.
