Subject: Problems with traffic during the peak hours.

Sir,

Through the columns of your well-known newspaper, I want to draw the government's attention towards the problems faced during the peak-hours of traffic both in the morning and the evening not only by the residents of Vaishali but also by the other passers-by. This is the only main road which has an extreme flow of traffic. It connects more than ten small colonies and the people use this road. The office-goers, cars, three-wheelers, two-wheelers, cyclists, and there make it too congested to pass even a pedestrian on it. The school-going kids and the old find it difficult even to cross the other side of the road. Although there are traffic signals on the crossing yet the traffic is beyond control. In addition to this, it caused a health hazard to all. Noise and smoke of vehicles etc. impair our hearing power and breed ailments of respiration.

To combat this problem, there is enough space on both sides of the road. It can be widened and two zones should be created for the smooth flow of traffic. Separate lanes can be created for cyclists and pedestrians. Peace zones can be earmarked near the institutions and the hospitals. I think these measures can help a lot in tackling the congestion. So it is the need of the hour to initiate certain steps by the government in this respect. I hope my views will get a due place in your newspaper in the interest of the common good.

Yours faithfully
Raj/Rani
Secretary
