Subject: Evil results of people's migration to cities

Sir,

I am writing this to highlight the evil results of people's migration to cities.

A large number of people are migrating to cities every other day. They find the job opportunities in the villages inadequate to meet both ends. They reach the cities in search of jobs and better opportunities.

Their dreams get shattered as soon as they reach the cities. They cause a burden on the basic infrastructure there. They live in groups in small rooms. They cause crowds and pollution. The **population of the city swells. They cause a rush in transports, clinics, schools, parks, and hospitals. This trend can be checked if satellite towns are set up around the cities. All the industries and officers are shifted to townships. good hospitals, markets, and institutions should be opened there.**

Kindly look into the grave problem and find out the mean of its solution.

**Yours faithfully,
Ramesh/Rachna**
